

Yasmien Tareq

+201120677108 | yasmientareq@gmail.com | Portfolio: [Jasmien Tareq](#)

Summary

Motivated and detail-oriented front-end developer with a strong foundation in HTML, CSS, and JavaScript, and experience in frameworks like React and Angular. Skilled in building responsive, minimalistic web applications focused on accessibility and user experience. Proficient in Git and GitHub for version control. Currently completing a degree in Technology and Development, with hands-on projects that showcase problem-solving skills, clean coding practices, and a commitment to delivering pixel-perfect web solutions.

Education

Zagazig University

Bachelor of Technology and Development

October, 2021 - June, 2025

Coursework

Web Development Fundamentals | Responsive Web Design | JavaScript Programming | User Interface (UI) and User Experience (UX) Design | Web Performance Optimization | Web Accessibility | Computer Science Fundamentals.

Experience & Internship

Front-End Developer Intern

DEPI - Digital Egypt Pioneers Initiative
2024

April, 2024 – October

- Developed and optimized web interfaces using HTML, CSS, and JavaScript to create responsive and visually appealing pages.
- Utilized Bootstrap for responsive design and streamlined UI components, ensuring a consistent look across devices.
- Built dynamic and interactive user interfaces using Angular, focusing on component-based architecture and state management.
- Gained experience in debugging and resolving issues related to cross-browser compatibility and performance optimization.

Labeller

MEEG

June, 2023 – October 2023

- Collaborated effectively with team members to complete projects, honing communication and teamwork skills.
- Utilized strong computer proficiency to manage tasks, troubleshoot technical issues, and improve operational efficiency.
- Gained experience working in a fast-paced environment, managing deadlines, and maintaining attention to detail.

Projects

E-commerce Web App

Technologies: Angular, Bootstrap, REST API

- Built an e-commerce platform with product browsing, filtering, and shopping cart functionality.
- Used React for component-based architecture and Bootstrap for responsive design.
- Integrated third-party APIs for dynamic product data and user authentication.

Personal Portfolio Website

Technologies: HTML, CSS, JavaScript

- Designed and developed a responsive portfolio to showcase my front-end projects.
- Used CSS Grid and Flexbox to create modern layouts, with attention to accessibility.
- Implemented SEO practices for improved search engine visibility.

Task Management App

Technologies: Angular, TypeScript, Bootstrap

- Developed a task management web application with dynamic task lists and user authentication.
- Implemented Angular components for a scalable, single-page application interface.

Technical Skills

- **Front-End Development:** Proficient in HTML5, CSS3, JavaScript, and Bootstrap for building responsive and user-friendly interfaces.
- **Frameworks & Libraries:** Experienced with React and Angular for developing dynamic single-page applications.
- **Technologies:** Skilled in version control using Git and GitHub for efficient collaboration and code management.
- **Responsive Design:** Expertise in CSS Grid, Flexbox, and media queries to ensure seamless experiences across devices.
- **Development Tools:** Familiar with Visual Studio Code, Chrome Developer Tools, and Figma for code development and design.
- **Additional Skills:** Strong understanding of web accessibility standards (WCAG), SEO best practices, debugging, and testing.
